Business with Computing BSc (Hons)

4 years (with a Foundation Year)

An interdisciplinary degree designed to equip you with business and technical skills required for a changing world

BSc (Hons) Business Studies with Computing offers you the opportunity to take Business as a major subject with Computing as a minor subject. By studying Business as a major you will develop skills in business and management functions, for example finance, marketing, supply chain management, leadership and organisational behaviour. By studying Computing as a minor, you will develop skills on managing a business's computer hardware, network operations and cyber security.

Career Opportunities

If you are interested in developing a career in business where analysing, developing and securing the business operating networking systems is a component, then BSc (Hons) Business Studies with Computing is the course for you.
